

Profoto TTL and HSS now for Fujifilm

Empowering your creativity

2017.09.07

Profoto today announces collaboration between Profoto and Fujifilm to offer optimized compatibility between Profoto flashes and Fujifilm cameras. When the unique Profoto AirTTL was first announced in November 2013, it revolutionized the photography industry by enabling a lean workflow and making it possible to seamlessly merge your camera with your flash. Now we are proud to include Fujifilm shooters in the AirTTL family, empowering photographers to be more creative and focus less on settings.

“Together with Fujifilm, we are proud to announce our latest family member – the Air Remote TTL-F. Light is the essence of every image and the Profoto AirTTL makes light shaping easier. It unlocks new creative possibilities and helps you go from idea to final image faster. We are happy to help the world’s most ambitious image creators turn their ambition into reality,” says Anders Hedebark, President of Profoto.

Profoto Air Remote TTL-F is a small, wireless radio transmitter that can be attached to the Fujifilm camera’s hot shoe. The remote offers full TTL and HSS capability with Profoto’s B1X, B1, B2, D2 and Pro-10 lights.

The Air Remote TTL-F will start shipping at the end of the year.

Profoto – the light shaping company **A commitment to light shaping excellence today, and tomorrow.**

Profoto is more than a brand. Profoto is more than the world-leading light shaping products we make. Profoto is dedicated to making every image the best it can possibly be by helping the creator of that image bring the very best quality of light to it. And when you consider there are literally billions of images taken every single day, then you start to truly understand the full extent of our commitment to light shaping excellence.

That dedication and passion was imprinted upon our DNA from the very beginning. 50 years ago, our founders Conny Dufgran and Eckhard Heine resolved to make the very best flash for the very best photographers – and they succeeded. That’s a standard that we don’t just aim to maintain – but to surpass.

Because we believe that light is the indispensable heart of all image creation, no matter what the situation, the ability to create amazing images is directly linked to the ability to master light shaping. That core principle is the key to enabling a world filled with incredible images, and the purpose of every single product we make.

Features Air Remote TTL-F

- Attach to your Fujifilm camera's hot shoe to wirelessly connect camera and AirTTL light into one.
- Shoot in TTL Mode for fully automatic point-and-shoot shots.
- Shoot in HSS Mode to shape light in broad daylight.
- Switch from TTL Mode to Manual Mode with the automated TTL settings intact – a huge time saver.
- Sync and manually control any Profoto light that is compatible with Air.
- Intuitive and easy to use user interface.
- Long operating range of up to 300 m (1,000 ft).
- 8 digital channels.
- Controls up to 3 groups of lights on each channel.
- USB port for firmware upgrades.
- Collaboration with Fujifilm for future proof compatibility with new cameras.
- Approved for worldwide use.

Specifications

Product number

901047 Profoto Air Remote TTL-F

1 × Air Remote TTL-F incl. batteries
1 × USB 2.0 Cable
1 × Wrist Strap
1 × Accessory Pouch

Short specifications

Frequency band: 2.4 GHz
No. of channels: 8 (1-8)
Wireless range: Up to 300 m (1,000 ft)
Connections: Fujifilm hot shoe
Power input: 2 x AAA Alkaline
Battery life: Up to 30 hours

Size

75 × 60 × 35 mm (2.9 × 2.3 × 1.4 in)

Weight

75 g (2.6 oz) incl. batteries
